

Dear Doctor Priyadarshi,

Fortis hospital is one of the best hospitals in India. but the journey of being good to great can only be done when the doctors like you are present inside the hospital. Question arises now. do we know how the operation was performed? answer is yes. During my last operation I was in pain for a week and when in pain the week becomes a year. However this time the operation was like a 4 hour sleep with a very less, can say no pain after the operation. I felt like my son is with me during the whole course as your nature is calm and understanding.

We Travelled a long distance of 360 K.M. (from Jammu) to consult you. You are a true citizen of nation and this nation needs doctors and hospitals like you and fortis respectively. We pray to god for your good health and successful future and may fortis shall grow and every person could reach the hospital.

with warm regards.

Sangita
